Rethinking Leadership in the Digital Age

The eponymous 1981 album ‘Computer World’ by the band ‘Kraftwerk’ portrays a society in which digitalization permeates all aspects of our lives. It addressed issues that were decades ahead of their time, ranging from human-computer-interactions to love and emotions in the digital age. Forty years later we live in that imagined future. The world of work, including leadership, is in the midst of a massive digital transformation at all levels.

The ongoing digital transformation and the so-called ‘new normal’ in the future of work poses both challenges and opportunities for leaders and their organisations. It is reflected in ongoing academic debates, for instance regarding leading virtual teams, rethinking leadership theory, organisational transformation for virtual workforce, skills development for virtual team players, and the impact of digital technology on wellbeing that are all core to leadership effectiveness in a digital and hybrid world of work.

Core issues in both academia and among practitioners that we would like to contribute to with this special issue include but are not limited to the following:

- Which kind of leadership is required in a digital and hybrid world of work? How can models of and current debates around servant leadership, shared leadership, and distributed leadership contribute to these new challenges?
- What is and what should be the role of AI in leadership? Where can AI meaningfully support executive decision-making (e.g., with data mining tools; AI supported decision algorithms) and where do we need to draw the line and put the human touch first (e.g., to ensure ethical and high-quality decisions in complex situations)?
- How can leaders ensure wellbeing at work in a digital/hybrid work environment and what do leaders need to know, learn, and do to ensure everyone in their organisation can stay safe and healthy?
- How can leaders ensure equality and inclusion in a digital/hybrid world and balance the pros (e.g., advantages of working from home for working parents) with the cons (e.g., blurring of lines between private and work domains) and ensure fairness for all?
- What kind of training and skills do leaders need to be effective in the digital/hybrid future?
- How can we measure leadership effectiveness in a digital/hybrid world?
- What are the main ethical challenges for leadership in a digital/hybrid world?

With this special issue call, we would like to invite not only leadership and management scholars but also scholars from relevant neighboring disciplines such as computer and cognitive science, behavioral science, philosophy, psychology, and sociology.

Manuscripts should be submitted in English only to increase impact and international readership. Please submit your paper by email (docx or PDF-file) to one of the guest editors of the special issue, who you may also contact for further information and questions. Prior to submission, please visit the author guidelines on www.dieunternehmung.ch and follow the instructions provided.
**Timeline**

- Submission of contributions: October 1, 2022
- Feedback on initial submission: December 15, 2022
- Submission of revised manuscript: February 15, 2023
- Submission of final manuscript: May 15, 2023
- Publication of special issue: September 2023

„Die Unternehmung“ pursues the goal of spreading new insights from business management research, drawing attention to important challenges in business practices, introducing scientifically based practical solution approaches as well as promoting the exchange between science and practice.

„Die Unternehmung“ addresses scientists, university students and professors as well as decision makers in business. With its concept of combining theoretical standards and practical relevance in high-quality contributions, it ranks among the leading management journals in German.

All submitted contributions are subject to a Double-Blind-Review.
